

Project Charter: Aircraft Avionics Upgrade Project

Sponsoring organization: Nordholm Avionics Systems.

Project sponsor: David Whitfield, VP Engineering.

Project manager: Sofia Reyes.

Project start date: January 10, 2027. Target delivery date: July 30, 2027.

Project objective: upgrade the flight management, GPS positioning, and autopilot integration systems across the regional aircraft fleet to meet updated FAA avionics standards and improve navigation accuracy.

Scope includes: GPS receiver replacement, flight management software upgrade, autopilot interface integration, cabin display unit upgrade, and full FAA certification of the upgraded systems.

Out of scope: engine control systems, cabin entertainment systems, and airframe structural modifications.

Key stakeholders: Procurement (Elena Kovacs), Software Integration (Marcus Chen), Quality Assurance (Amara Osei).
